

<UICollectionViewDelegate
FlowLayout>

<UICollectionViewDataSource>

FNPosterController()

```
graph BT; A[FNPosterController()] --> B["<UICollectionViewDelegate<br/>FlowLayout>"]; A --> C["<UICollectionViewDataSource>"];
```

The diagram illustrates the relationship between the `FNPosterController()` class and two UICollectionView protocols. The `FNPosterController()` class, represented by a grey box at the bottom, has two blue arrows pointing upwards to two white boxes. The left white box contains the text `<UICollectionViewDelegate FlowLayout>`, and the right white box contains the text `<UICollectionViewDataSource>`. This indicates that `FNPosterController()` conforms to both protocols.
