

<UITableViewDataSource>

<UITableViewDelegate>

FNBrandSaleListController()

```
graph BT; FNBrandSaleListController() --> UITableViewDataSource; FNBrandSaleListController() --> UITableViewDelegate;
```

The diagram illustrates the relationship between a custom class and two UIKit protocols. At the bottom, a gray box labeled 'FNBrandSaleListController()' has two blue arrows pointing upwards. One arrow points to a white box labeled '<UITableViewDataSource>' on the left, and the other points to a white box labeled '<UITableViewDelegate>' on the right. This indicates that the 'FNBrandSaleListController()' class implements both the 'UITableViewDataSource' and 'UITableViewDelegate' protocols.
