

<UICollectionViewDataSource>

<UICollectionViewDelegate>

ZLThumbnailViewController()

```
graph BT; ZLThumbnailViewController() --> UICollectionViewDataSource; ZLThumbnailViewController() --> UICollectionViewDelegate;
```

The diagram illustrates the relationship between a custom class and two UIKit protocols. At the bottom, a box labeled 'ZLThumbnailViewController()' has two blue arrows pointing upwards. One arrow points to a box labeled '<UICollectionViewDataSource>' on the left, and the other points to a box labeled '<UICollectionViewDelegate>' on the right. This indicates that the ZLThumbnailViewController class implements both protocols.
