

<UICollectionViewDataSource>

<UICollectionViewDelegate>

YZDisplayViewController()

```
graph BT; YZDisplayViewController() --> UICollectionViewDataSource; YZDisplayViewController() --> UICollectionViewDelegate;
```

The diagram illustrates the relationship between a custom class and two UIKit protocols. At the bottom, a gray box labeled 'YZDisplayViewController()' has two blue arrows pointing upwards. One arrow points to a white box labeled '<UICollectionViewDataSource>' on the left, and the other points to a white box labeled '<UICollectionViewDelegate>' on the right. This indicates that the YZDisplayViewController class conforms to both protocols.
