

<UITableViewDataSource>

<UITableViewDelegate>

JMProductRebateRuleController()

```
graph BT; A[JMProductRebateRuleController()] --> B[<UITableViewDataSource>]; A --> C[<UITableViewDelegate>];
```

The diagram illustrates the implementation of two protocols by a single class. At the bottom, a box labeled 'JMProductRebateRuleController()' has two blue arrows pointing upwards. One arrow points to a box labeled '<UITableViewDataSource>' on the left, and the other points to a box labeled '<UITableViewDelegate>' on the right. This indicates that the JMProductRebateRuleController() class implements both the UITableViewDataSource and UITableViewDelegate protocols.
