

<UITableViewDataSource>

<UITableViewDelegate>

JMASBindAlipayController()

```
graph BT; JMASBindAlipayController() --> UITableViewDataSource; JMASBindAlipayController() --> UITableViewDelegate;
```

The diagram illustrates the implementation of two UIKit protocols by a custom controller. At the bottom, a gray box labeled 'JMASBindAlipayController()' has two blue arrows pointing upwards. One arrow points to a white box labeled '<UITableViewDataSource>' on the left, and the other points to a white box labeled '<UITableViewDelegate>' on the right. This indicates that the controller implements the methods defined in both protocols.
