

<UITableViewDataSource>

<UITableViewDelegate>

GetProvinceViewController()

```
graph BT; A[GetProvinceViewController()] --> B[<UITableViewDataSource>]; A --> C[<UITableViewDelegate>];
```

The diagram illustrates the relationship between a custom view controller and two UIKit protocols. At the bottom, a gray box labeled 'GetProvinceViewController()' has two blue arrows pointing upwards. One arrow points to a white box labeled '<UITableViewDataSource>' on the left, and the other points to a white box labeled '<UITableViewDelegate>' on the right. This indicates that the 'GetProvinceViewController()' class conforms to both protocols.
