

<UICollectionViewDelegate
FlowLayout>

<UICollectionViewDataSource>

FNDetailShopController()

```
graph BT; A[FNDetailShopController()] --> B["<UICollectionViewDelegate<br/>FlowLayout>"]; A --> C["<UICollectionViewDataSource>"];
```

The diagram illustrates the relationship between the `FNDetailShopController()` class and two UICollectionView protocols. The controller class, represented by a grey box at the bottom, has two blue arrows pointing upwards to two white boxes. The left box represents the `<UICollectionViewDelegateFlowLayout>` protocol, and the right box represents the `<UICollectionViewDataSource>` protocol. This indicates that `FNDetailShopController()` conforms to both protocols.
