

<FNMNineTitleViewDelegate>

<UISearchBarDelegate>

ShopRebatesViewController()

```
graph BT; A[ShopRebatesViewController()] --> B[<FNMNineTitleViewDelegate>]; A --> C[<UISearchBarDelegate>];
```

The diagram illustrates the relationship between a class and two protocols. At the bottom, a box labeled 'ShopRebatesViewController()' has two blue arrows pointing upwards. One arrow points to a box labeled '<FNMNineTitleViewDelegate>' on the left, and the other points to a box labeled '<UISearchBarDelegate>' on the right. This indicates that 'ShopRebatesViewController()' implements both protocols.
