

<UITableViewDataSource>

<UITableViewDelegate>

QJVersionUpdateView()

```
graph BT; QJVersionUpdateView() --> UITableViewDataSource; QJVersionUpdateView() --> UITableViewDelegate;
```

The diagram illustrates the relationship between a custom view class and two UIKit protocols. At the bottom, a gray box labeled 'QJVersionUpdateView()' has two blue arrows pointing upwards. One arrow points to a white box labeled '<UITableViewDataSource>' on the left, and the other points to a white box labeled '<UITableViewDelegate>' on the right. This indicates that 'QJVersionUpdateView()' conforms to both protocols.
